

GENERAL RESUME · A CLEAR VIEW OF THE WORK

Murray Lewin

Consultant Engineer specialising in maintenance strategy, reliability and asset data.

This is my broad, uncustomised resume: a practical overview of the engineering, reliability, asset management and software work I bring to a team.

PROFESSIONAL SUMMARY

I am a consultant engineer in Deloitte's Strategy, Risk and Transactions practice, working within a specialist asset management team.

My work combines maintenance strategy optimisation, reliability analysis, maintenance master data and software delivery. I enjoy the point where engineering judgement meets useful data: finding what matters, making it visible and building tools that help people act on it.

AT A GLANCE

FOCUS

Maintenance strategy, reliability engineering, defect elimination and master data

INDUSTRY

Mining and heavy industry across fixed plant and mobile equipment

TOOLSET

SAP, Databricks, Python, SQL, Power BI, React, TypeScript, FastAPI and Azure

BASED

Cottesloe, Western Australia · FIFO experienced

WHAT I BRING

Engineering context

Data fluency

Clear communication

Practical delivery

Curiosity
